

"Seat for Amusement Apparatus"**ABSTRACT**

A seat for amusement apparatus, unusually suitable
5 for allowing the user to adopt a new position on the
apparatus, comprising a support and means for
immobilising the user on the support. The immobilising
means comprise at least one support in front of the user
and opposing means suitable for acting on the user's
10 back. The opposing means comprises an arm which can move
between a lowered position in which the user can sit
down on the support and a raised position in which one
end of the arm abuts against the user's back.
